Step 1 Center Cabinet

assemble **O1** bottom front plate to **M1** left side panel and **M1** right side panel and also **O** bottom rear panel.

Step 3 Center Cabinet

Turn right side up and add middle or center **M2** panel with 3 screws into the bottom base **P**.

Step 5 Legs

screw glides **C** into **G2** bottom feet, screw through **G2** bottom feet into **L** & **J** leg posts Place **G1** on top screwing down to **J** & **L** for both legs.

Step 2 Center Cabinet

Turn upside down and insert bottom base panel **P** attaching with 4 screws.

Step 4 Center Cabinet

Add **N** front top with 2 screws into **M1** panels left and right and **Q** top rear with 2 screws also into **M1** panels left and right.

Step 6 Keyboards

Assemble runners **E** to sides of keyboards **H**
Attach brackets **F** to runners **H**, when attached the brackets will point away from the keyboard.

Step 7 Combine Assemblies

Note: do not over tighten as this may cause stripping of the bolts and void the warranty.

Lay top **R** upside down with onto a non-scratching surface.

Turn cabinet assembly upside down again onto **R** with front brackets **N** toward beveled edge over the mounting holes in the top's underside. Insert **K** tabs into rear sides of M1 on each side. Insert the opposite tabs of **K** into **L** on each side. Mount **G1** into **R** and repeat on other side.

Tighten cabinet to **R** with 6 screws. Screw glides **C** into the legs at each corner. Mount Keyboard assembly to top **R** on each side with the rounded front facing the beveled edge.

Step 9 Combine Assemblies

With assistance upright the entire unit;

Position **W2** hinges over the pins to install the rear doors.

At the front insert **Z** into **W**.

Step 8 Install Doors

Install wheels for the front doors **W**.

Place wheels **B** into tracks inside the cabinet.

Retract spring axel **D** and when level release the axel into the wheel **B** for each side of the door. Then repeat on the other side.
