Wall-mounted Whiteboard Instructions

Note: After assembly, remove the protective film from the board with a utility knife.

1. Slide tray into groove on bottom of wall board. Snap two horizontal chalk lines at the heights indicated from the floor. If attaching to drywall, drill four \( \frac{1}{4} \)" holes as specified.

2. Insert drywall anchors B into holes then attach brackets A at the bottom with screw C making sure the bracket is in the lowest position.

3. Attach brackets A at the top with screw C making sure the bracket is in the highest position. Tighten screw just enough so that the bracket can be tapped down with hammer.

4. Place white board on lower brackets making sure to center it with middle lower bracket A. Attach bracket to wallboard using screw D starting with the middle lower bracket.

5. Tap the top brackets down so they are touching the top of the board. Attach bracket to wallboard using screw D.

35\( \frac{1}{2} \) x 47\( \frac{1}{4} \)" Board

Chalk Line 33\( \frac{1}{2} \)" above the bottom Chalk Line

Chalk Line 1" above the desired bottom position. Recommended 37\( \frac{1}{2} \)" from floor.

Parts List

- Hardware provided is for drywall installation. If attaching to other material fasteners are to be furnished by other.
