

# Power-up your workflow, from anywhere.

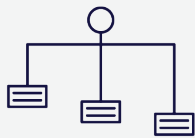

Introducing our  
Battery-Powered Mobile Workstation

When it comes to staying productive in a large commercial facility, workstations tied to the wall simply don't deliver the freedom your team needs.

Luxor's Battery-Powered Mobile Workstation is an ergonomic workstation on wheels that lets your team power devices wherever they go. With a powerful 444Wh battery and a versatile range of outlets that move with the desk, team members can work flexibly from anywhere while charging their devices.

Perfect for distribution centers, manufacturing, or retail, this powered workstation is thoughtfully designed to deliver enhanced productivity and free-moving workflow that makes all the difference in the modern workplace.

## Uninterrupted Workflow

With its integrated battery, devices stay charged and ready for a full 8 hours. The standard charging receptacle and convenient USB port give you the flexibility to charge each of the devices your team members need.

## Heavy-Duty Construction

Designed to perform in demanding environments, the mobile workstation is built with commercial-grade casters and a sturdy, high capacity steel frame with a durable powder-coated metal finish.

## Built for Productivity

Because efficiency and organization go hand-in-hand, this workstation features cable management and attached accessories including a waste basket, scan gun holder, and a locking drawer.
